DECORIA®

LUXURY VINYL FLOOR

 SINCE 1979
DAEJIN

 SINCE 1979
DAEJIN

The ultimate name of luxury vinyl floor from Korea

Daejin introduced products by developing Anti-Bacteria technology for the first time in Korea. And we are leading international markets in USA, EU and many other countries by supplying newly developed eco-friendly click and loose-lay tiles which can be installed without adhesives.

On top of that, we've launched the anti-scratch durable UV coated products and will continue our efforts and challenge to fulfill the demand of our clients and satisfaction.

Create a space with nature

Merits of DECORIA Tiles

High Density PU Coating

It assures you the longer life comparing to normal PU coating and durability against scratches.

Glass Fiber Sheet in Products (Ecoria Lay, Ecoria Click, Ecoria Acoustic, Ecoria House)

Glass fiber sheet is inserted in products to keep dimensional stability by preventing shrinkage & expansion on floorings.

Recycled Material

The products are made with recyclable material to contribute protecting environment, 100 % pure virgin products are available upon request.

Various Color / Pattern Design Collection

Wide choices for any flooring places by over 500 various kinds of design and color.

Glueless Installation

(Ecoria Lay, Ecoria Click, Ecoria Acoustic,
SPC, Ecomax)

Easy installation, no need of extra professional work with Click system and Loose lay tile.

Structure and Product Features

DECORIA® Dryback

Eco-friendly various function flooring

High Density PU Coating

Application of US EPA approved organic and inorganic hybrid antibacterial agents

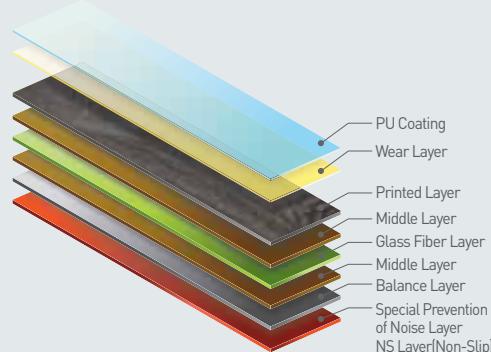

Recycled Material

Various Color / Pattern Design Collection

ECORIA® Acoustic

LVT with less noise for silent Residential environment

High Density PU Coating

Application of US EPA approved organic and inorganic hybrid antibacterial agents

Recycled Material

Various Color / Pattern Design Collection

Excellent stability in severe thermal environments with glass fiber layer

Easy installation without adhesive

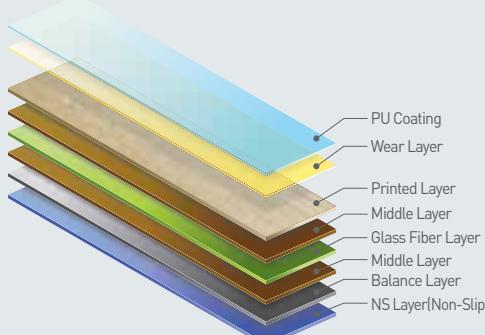

Non-slip Function

Make a quiet environment with the noise prevention layer

ECORIA® Looselay-NS

Environment-friendly luxury vinyl tiles (Glueless)

High Density PU Coating

Application of US EPA approved organic and inorganic hybrid antibacterial agents

Recycled Material

Various Color / Pattern Design Collection

Excellent stability in severe thermal environments with glass fiber layer

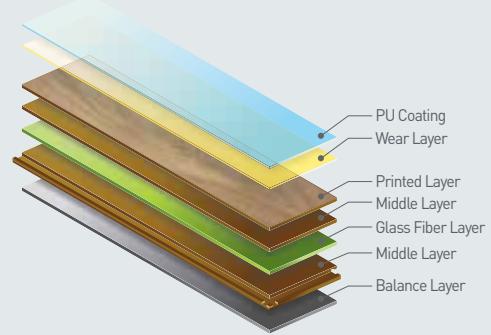

Easy installation without adhesive

Non-slip Function

ECORIA® Click

Glueless luxury vinyl plank featuring patented click technology

High Density PU Coating

Application of US EPA approved organic and inorganic hybrid antibacterial agents

Recycled Material

Various Color / Pattern Design Collection

Excellent stability in severe thermal environments with glass fiber layer

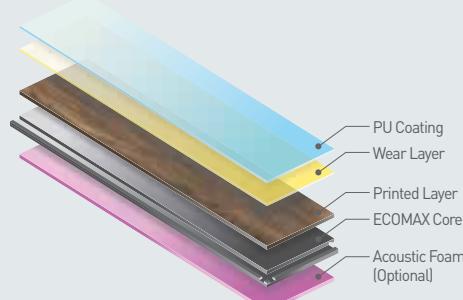

Easy installation without adhesive

Structure and Product Features

ECORIA® Ecomax

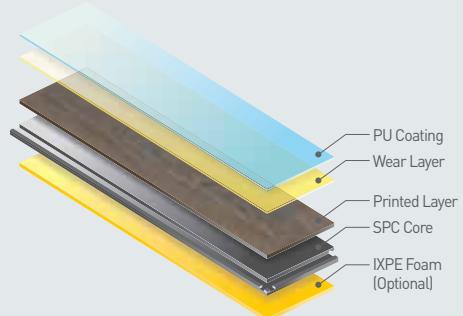

Rigid core without containing wooden material

- High Density PU Coating
- Application of US EPA approved organic and inorganic hybrid antibacterial agents
- Recycled Material
- Various Color / Pattern Design Collection
- Easy installation without adhesive

ECORIA® SPC

Rigid core without containing wooden material

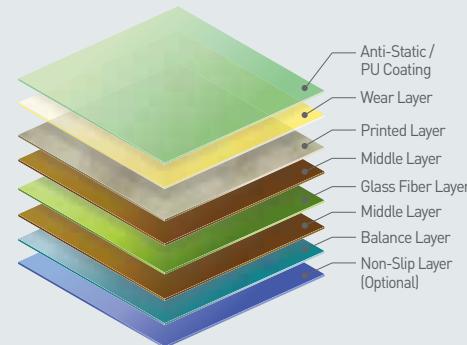

- High Density PU Coating
- Application of US EPA approved organic and inorganic hybrid antibacterial agents
- Recycled Material
- Various Color / Pattern Design Collection
- Easy installation without adhesive

COMMERCIAL FLOORING DECORIA

OA Tile

High functional floor covering to prevent static electricity

- High Density PU Coating
- Application of US EPA approved organic and inorganic hybrid antibacterial agents
- Recycled Material
- Various Color / Pattern Design Collection
- Excellent stability in severe thermal environments with glass fiber layer
- Easy installation without adhesive
- Non-slip Function
- Antistatic function prevents damage with static electricity

Product Specifications & Technical Data

Specific Measurements of DECORIA

Type & Composition		PVC Laminated Floor Covering
Application		Commercial, Residential
Surface Treatment		PU & Anti-bacterial, Per design
Profile		Beveled / Non-beveled, Per design
Tile Size (mm)	EN 427	470 x 470, 184 x 950
Total Thickness(mm)	ISO 24346 (EN 428)	3.0
Wear Layer Thickness (mm)	ISO 24340 (EN 429)	0.3 0.5 0.7
EN 13501-1	Bfl - S1	
Fire Rating	Mekel Burner Test	Pass
Heat Stability	KSM 3802	0.3mm / 0.05 (80 °C + 2°C, 6hr / hr)
Slip Resistance	BS 7976-2	PVC Laminated Floor Covering RZ Surface Roughness : Moderate
Residual Indentation	EN ISO 24343-1 (EN 433)	≤ 0.10 mm
Color Fastness	ISO 105-B02	≥ 6
Dimensional Stability	ISO 23999 (EN 434)	≤ 0.25 %
Flexibility	EN 435	No Crack was found
Electrical Behavior	EN 1081	Pass

Installation & Maintenance

Preparations

- The surface of the floor must be completely dry. Please note that even though the floor may appear dry, it may still retain moisture. Moisture testing is a mandatory step in subfloor preparations.
- In newly constructed buildings, it is necessary to dry the flooring surface for 7 to 14 days prior to application to ensure that no moisture is retained in cement surfaces.
- Any polish, paint, dirt, etc. must be completely removed from the floor before installation. Sweep the entire floor to remove any sand, soil and debris on the surface by using dried mop.
- Ensure that the floor surface is flat and level. Use a scraper to flatten the floor surface or a putty knife to remove gum and/or labels.
- Maintain the room temperature above 15 °C (59 °F) before installation. Adhesive and flooring products must be kept in the same environment for at least 24 hours before installation begins.
- Use only DECORIA recommended adhesives.

Installation

- Prepare all rulers, cutters, adhesives, spreaders, and compass dividers before commencing work.
- Check that all application products are of the same batch/lot number.
- Find the exact center of the floor by marking vertical and horizontal lines across the floor.
- Measure the squareness of the marked lines, and then start applying adhesives on the first quarter of the marked floor space.
- Work on small portions of the floor at a time, and apply adhesives accordingly. Optimum usage of adhesive is 0.3 to 0.45 kg per square meter.
- Approximately 20 to 30 minutes after applying adhesive, lay the flooring products.
- Keep a distance of 1 mm from the wall and the edge of the flooring products. Press products down firmly so that the product lies flat on the ground.
- As the adhesives are highly flammable, avoid any contact with sparks or open flames.
- As the adhesives dry quickly, remove excess adhesive immediately by using alcohol or alkali water.

Maintenance

- In order to allow the flooring adhesives to be cured, restrict traffic and do not move furniture onto a newly installed floor for at least 24 hours after installation. Additionally, clean the newly tiled floor at least 3 days after installation.
- Be careful not to put any dents or marks on the floor when moving heavy furniture.
- Furniture polish and / or rubber supports may leave stains on the floor surface over a long period of time. Check the bottom of furniture to ensure it is clean before moving it on to the floor.
- The application of surface dressing should be done depending on the different conditions. Under high traffic conditions, the dressing should be stripped and reapplied every one or two months. However, under general housing conditions, this may only need to be done once every six months.
- When removing stains and polish, do not use dense solvents or household cleaning fluids. Instead, use general floor polish removers and cleaners with alkali water.

Adhesives

Acrylic latex based adhesives (Commonly called as Acryl adhesives)

- Applied over the sub-floors so that its surface retains almost no moisture.
- As it is non-toxic and a soft adhesive power, it provides for easy maintenance following installation.
- Use 1/8 inch notched steel trowel when applying.

Chemically Engineered Resin Based Adhesives (Commonly called as Urethane adhesive)

- Provides moisture and alkali resistance over non-porous surface.
- Use 1/8 inch notched steel trowel when applying.

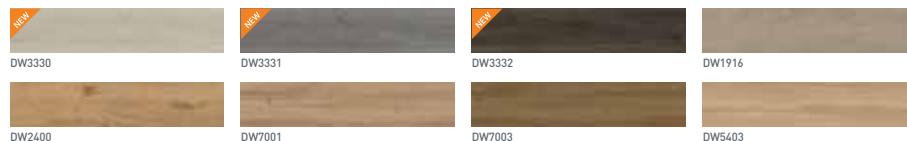

Thermosetting Epoxy Adhesives (Commonly called as Epoxy adhesive)

- Recommended for use in places subjected to excessive heat or being cold and damp.
- To be mixed in unequal quantities of two parts epoxy resin immediately prior to application.
- Use 1/16 inch notched steel trowel when applying.

Merits of DECORIA Vinyl Sheet Flooring

High Density PU Coating

Longer life comparing to normal PU Coating and durability against scratches

Glass Fiber Sheet layer

Providing dimensional stability by preventing shrinkage & expansion

Easy Cleaning & Maintenance

With special surface treatment

Easy of Installation

With minimum joints

Recycled Material

Made with recyclable material to contribute protecting environment

Various Color / Pattern Design Collection

Wide choices for any flooring places

Maintaining Eco-Friendly Space

No harmful chemicals

Comfort & Sound Insulation

Providing a comfortable environment

Cost-Effective

Vinyl sheet flooring is affordable

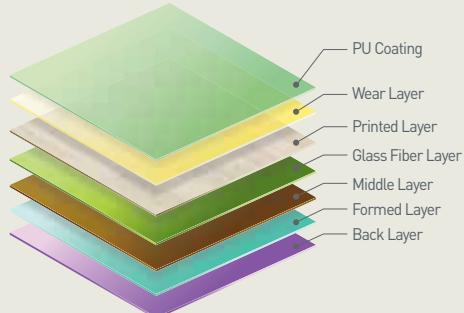

Structure and Product Features

Product Specifications & Technical Data

DECORIA®

Vinyl Sheet

The Ultimate Name of Vinyl Flooring

RESIDENTIAL USE

High Density PU Coating

Recycled Material

Various Color / Pattern Design Collection

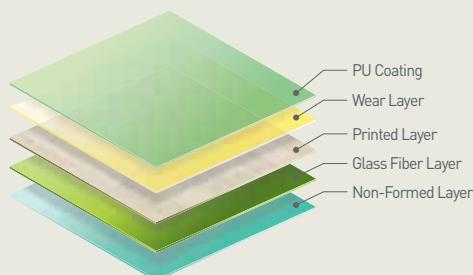

Excellent stability in severe thermal environments with glass fiber layer

• Thickness : 1.8mm / 2.2mm / 3.0mm / 4.5mm / 6.0mm • Width : 1,830mm / 2,030mm / 2,230mm

DECORIA®

Vinyl Sheet

The Ultimate Name of Vinyl Flooring

COMMERCIAL USE

High Density PU Coating

Recycled Material

Various Color / Pattern Design Collection

Excellent stability in severe thermal environments with glass fiber layer

• Thickness : 1.5mm / 2.0mm / 3.0mm • Width : 1,830mm / 2,030mm / 2,230mm

Product Specifications

■ Width

1,830mm / 2,030mm / 2,230mm

■ Thickness

Residential Use : 1.8mm, 2.2mm, 3.0mm, 4.5mm, 6.0mm

Commercial Use : 1.5mm, 2.0mm, 3.0mm

Preparations & Installation

1. The surface of the floor must be completely dry.

Please note that even though the floor may appear dry, it may still retain moisture.

Moisture testing is a mandatory step in subfloor preparations.

2. In newly constructed buildings, it is necessary to dry the flooring surface for 7 to 14 days prior to application to ensure that no moisture is retained in cement surfaces.

3. Any polish, paint, dirt, etc. must be completely removed from the floor before installation.

Sweep the entire floor to remove any sand, soil, and debris on the surface by using dried mop.

4. Ensure that the floor surface is flat and leveled.

Use a scraper to flatten the floor surface or a putty knife to remove gum and/or labels.

5. Maintain the room temperature above 18 (65) before installation.

Adhesive and flooring products must be kept in the same environment for at least 24 hours before installation begins.

6. Use only DECORIA recommended adhesives.
